English

Another good game for folks who like strategies.

Customization of the character and lots of different features.

The game indeed has some bugs, but all-in-all the game experience for me is great.

It's not perfect, there are flaws and annoying details, but that does not change the fact that this is one of the most detailed and innovative strategies games ever.

Great game but could do with some bugs fixing!

All in all I would recommend the game.

. simplistic, not like proper complex fighters, and unlike bushido blade isn't actual 3d fighter

just fine for 2 shekels (seems abandoned in terms of lack of MP however). amazing game sooo fun!. In short this an awesome game !

I had a certain apprehension due to the previous bad notes but I imagine that the demo was not as successful as today.

The games on HTC Vive are not legion for the moment but it is growing fast and Behind You lack of interaction for the moment but I imagine that the developer are on it.

The graphics are stunning, the atmosphere very glaucous, the music, the sounds will ice your blood, a really incredible experience ! the total immersion!

A really promising games, I can't wait to play the defenitive version.

Frankly I recommend this game on HTC VIVE it's a must have ! Really realistic and Scary !. A masterpiece!!!.

why the ♥♥♥♥ did i get a random trading card from this i dont even have it installed what the ♥♥♥♥. Loved this series. Cool little games. Surprisingly addicting for a 2D game with only one input button per player. Lots of fun!

in a year altspace has not change at all or really updated much kinda went stale ,i highly reccomend everyone coming to V.R Chat its a billion times better so many worlds to run around arena battles a vr tv show gunters universe it has so much more community then AltSpace ,vr chat is updated all the time ,forget about boring altspace and come to V.R ChatALTSPACE 0V10.....V.R CHAT 10V10. A really great mini game. Inspired by Minesweeper but unlike anything you've tried, Tess Elated is fresh and inspiring.

The vibrant and diverse cast of characters makes the story both interesting and rewarding with plenty of laughs.

With a colorful and fun art style and a joyful soundtrack, the game is sure to keep your interest.. I loved every single aspect of this game.

The music is amazing, the background, the characters, the choices and i loved the stab on my heart when i did one of the GOOD endings.

10/10. Shenzhen Solitaire is the ultimate solitaire game. It takes what makes Free Cell a more stimulating game than the classic Solitaire, and it takes it to a whole new level, with a kind of cards that basically just get in the way since you can't group it with others.

If you like solitaire games, or any game made to relax and think a bit, you can't miss this gem.

American Wheel Added + Leaderboards Published:

Some users requested the addition of the American Roulette wheel (with the additional 00 on the wheel). This update has integrated the option to select between both the European (0 only) and American (0 and 00) wheels.

Additionally, I have added a Leaderboards button on the main menu so users can compare their balance to the global online leaderboards!
